AEON NEXT Delivery Co., Ltd.

From Chiba Minami Police Chief AEON NEXT Delivery Co., Ltd. awarded a letter of appreciation

AEON NEXT Delivery Co., Ltd. (President: Tomohiro Nozawa) received a letter of appreciation from Chiba Minami Police Station for its contribution to traffic safety classes at elementary schools on Thursday, January 30, 2025.

Traffic safety classes are held at local elementary schools, with the goal of helping children understand traffic rules and get into the habit of safe behavior. By using the company's delivery truck to check the inner ring difference and blind spots, the children experienced the actual traffic situation. This will encourage you to be aware of the dangers to your behavior near the truck and act more carefully. This experience has contributed to raising children's awareness of safety.

President Nozawa expressed their intention to continue contributing to the local community by putting the safety and security of the local community first, as well as the traffic safety class.

AEON NEXT Delivery will continue to deepen ties with local communities and actively work toward the realization of an affluent society.

Presentation ceremony of the letter of appreciation

About AEON NEXT Delivery

AEON NEXT Delivery Co., Ltd. will be responsible for the delivery function of AEON's online-only supermarket "Green Beans".

Based on the corporate philosophy of "continuing to bring happiness," we aim to be a company that supports the realization of happy lives for our stakeholders, including customers, business partners, local communities and employees, through delivery.

The products purchased with "Green Beans" will be delivered to the customer's home by our delivery crew (we call the driver "crew" because it also delivers "smile" and "happiness") in a vehicle with the brand color on the entire surface.

About "Green Beans"

"Green Beans" is AEON's online-only supermarket. The brand not only saves customers the time they spend shopping and doing housework by providing home delivery and delivery services from large logistics bases operated by advanced technology, but also creates fun and fulfilling time for customers and changes their lives through "Green Beans" products and services.
